

EXHIBIT 1

U.S. DEPARTMENT OF JUSTICE BUREAU OF ALCOHOL, TOBACCO, FIREARMS AND EXPLOSIVES																																																																																														
FACTORING CRITERIA FOR RIFLED BARREL WEAPONS WITH ACCESORIES (commonly referred to as "stabilizing braces") FOR CLASSIFICATION UNDER THE NATIONAL FIREARMS ACT (NFA) OR THE GUN CONTROL ACT (GCA).																																																																																														
<p>NOTE: The Bureau of Alcohol, Tobacco, Firearms and Explosives reserves the right to preclude classification as a pistol with a "stabilizing brace" for any firearm that achieves an apparent qualifying score but is an attempt to make a "short-barreled rifle" and circumvent the GCA or NFA.</p> <p>*As used in this worksheet, the term "accessory" is intended as a general term to describe the marketing of items commonly known as "stabilizing braces" and does not affect any ATF determinations whether such items when attached to a handgun are, in fact, "accessories" not necessary for the operation of the handgun, but which enhance its usefulness or effectiveness, or whether they are component parts necessary to properly operate a weapon, such as a rifle. Furthermore, use of that term does not affect any determinations whether such items are "defense articles" under the Arms Export Control Act. Please direct all inquiries as to possible liability for the firearms and ammunition excise tax, 26 U.S.C. sections 4181-4182 to the United States Department of Treasury, Alcohol and Tobacco Tax and Trade Bureau (TTB).</p>

Weapon:	Explanation:																																																																																													
Manufacturer/Model																																																																																														
SECTION I - PREREQUISITES																																																																																														
1. The weapon must weigh at least 64 ounces.		[Suitability of "Brace" use]																																																																																												
2. The weapon must have an overall length between 12 and 26 inches.		* Weighed with magazine - unloaded / accessories removed * Length measured with all non-operational accessories removed																																																																																												
Weapon must meet both Prerequisites in order to proceed to Section II.																																																																																														
INDIVIDUAL CHARACTERISTICS	POINT VALUE	POINT SUB TOTAL																																																																																												
SECTION II - Accessory Characteristics																																																																																														
[Determination of use as a "Brace" vs. Stock]																																																																																														
ACCESSORY DESIGN Not based on a known shoulder stock design 0 Incorporates shoulder stock design feature(s) 1 Based on a known shoulder stock design 2																																																																																														
REAR SURFACE AREA Device incorporates features to prevent use as a shoulder device 0 Minimized Rear Surface lacking features to discourage shoulder 1 Rear Surface useful for shouldering the firearm 2 Material added to increase Rear Surface for shoulder 3																																																																																														
ADJUSTABILITY Non-adjustable, fixed design 0 Adjustable or telescoping attachment designed for shoulder 2																																																																																														
STABILIZING SUPPORT Counterbalance Design - Non-Folding 0 Counterbalance Design that Folds creating Rear Contact Surface 1 OR: "Fin-type" design WITH Arm Strap 0 "Fin-type" design WITHOUT Arm Strap 2 OR: "Cuff-type" design that FULLY wraps around arm 0 "Cuff-type" design that PARTIALLY wraps around arm 1 "Cuff-type" design that FAILS to wrap around arm 2 "Split-stock" configuration not designed to wrap around shooter's arm 3																																																																																														
SECTION II SCORE ACHIEVED:		SCORE																																																																																												
Section II Must Score LESS than 4 in order to proceed to Section III		ATF WORKSHEET 4999 (5330.5) (5-21)																																																																																												
SECTION III - Configuration of Weapon			[Determination if weapon is shoulder fired]																																																																																											
LENGTH OF PULL - w/Accessory in Rear most "Locked Position" Less than 10-1/2 Inches 0 10-1/2 but under 11-1/2 Inches 1 11-1/2 but under 12-1/2 Inches 2 12-1/2 but under 13-1/2 Inches 3 13-1/2 Inches and Over 4																																																																																														
ATTACHMENT METHOD Standard AR-type Pistol Buffer Tube (6-6-1/2 Inches) 0 AR-type Pistol Buffer Tube with Adjustment Notches (AK-type) 1 Adjustable Rifle Buffer Tube 1 Adjustable PDW-type guide rails 1 Extended AR-type Pistol Buffer Tube 2 Inclusion of Folding Adapter extending length of pull 2 Use of "Spacers" to extend length of pull 2 Modified shoulder stock with rear replaced by "stabilizing brace" 3 Attachment method creates an unusable aim-point (slant) 3																																																																																														
"STABILIZING BRACE" MODIFICATIONS / CONFIGURATION "Cuff-type" or "fin-type" design with strap too short to function 2 "Cuff-type" or "fin-type" design with strap made out of elastic material 2 "Fin-type" lacking an arm strap 2 "Cuff-type" design with strap REMOVED 4 "Brace" accessory modified for shoulder 4 Modified Shoulder Stock (originally a Shoulder Stock) 4																																																																																														
PERIPHERAL ACCESSORIES Presence of a Hand Stop 2 Presence of a Secondary Grip (indicating two-handed fire) 4 Presence of Rifle-type Back-up / Flip-up Sights / Or no sights 1 Presence of Reflex Sight with FTS Magnifier w/ Limited Eye-Relief 2 Presence of a Sight/Scope with Eye Relief Incompatible with one-handed fire 4 Presence of a Bipod / monopod 2 Weapon as configured weighing more than 120 ounces 4																																																																																														
SECTION III SCORE ACHIEVED:		SCORE	* Weighed with magazine - unloaded																																																																																											
CLASSIFICATION:		Rifle or "Braced" Handgun
